

**Do you suffer from homeschool math curriculum fatigue? If so, enrolling in one of Michelle Mitchell's math courses offered at Great Oak Academy is a student/parent cure-all.**

Miss Mitchell points out connections between the Bible and what we are learning in class, providing great life lessons related to the topic we are learning. She encourages me not to be afraid to ask questions about what we are learning because any question is a good one to have. *C. Abney*

**Ms. Mitchell has been one of the biggest blessings in our homeschool journey!**

I am very thankful for Michelle's willingness to tutor my daughter in Geometry. She was very encouraging of her interest in the logical aspects of the subject and appreciated her questions and wanting to understand "why." Michelle was willing to tailor the curriculum and assignments to come up with an "honors" level course to challenge my daughter and keep my daughter's transcript competitive for college applications.

I also appreciate Michelle's care for her students as individuals. She is genuinely interested in their lives and is willing to pray for and with them, encouraging them with Godly advice. She is also gracious with students who struggle and make lots of mistakes. She shows people that she values them as persons and not merely based on academic performance. *V. Shelton*

Do you suffer from homeschool math curriculum fatigue? If so, enrolling in one of Michelle Mitchell's math courses offered at Great Oak Academy is a student/parent cure- all. Miss Mitchell's math classes not only prepared my son for college level math but instilled an incredible sense of math confidence that was not present prior to joining her class. This, plus nurturing a great work ethic, lead to his success in conquering geometry and Algebra 2. Miss Mitchell also works with your student and slows the pace when necessary, so concepts are fully understood. Attending Great Oak Academy for science and math classes is the next best decision, other than homeschooling, my husband and I have made. Sign up now and watch your child flourish. *D. Hamilton*

**Michelle Mitchell is the Mary Poppins of Math! Not only is she an accomplished teacher, but you can feel her love of math and the kids she teaches.**

Ms. Mitchell has been one of the biggest blessings in our homeschool journey! Math was becoming challenging for me to teach so I decided to sign up my oldest son for Ms. Mitchell's math class and it was the best decision. My son now loves math and understands difficult concepts thanks to Ms. Mitchell! She is an excellent teacher and a wonderful encouragement to all her students. She also inspires them to think outside the box with fun projects throughout the year. I would recommend Ms. Mitchell to anyone who is struggling with math. She will teach your child to love learning and to love math!

*J. Mori*

**Michelle was willing to tailor the curriculum and assignments to come up with an "honors" level course to challenge my daughter and keep my daughter's transcript competitive for college applications.**

We were really struggling with homeschool math. The kids were lost and the more we tried to help them, the more frustrated we all became. My boys, who had loved math, were growing to despise it. We were brought to tears on several occasions.

Enter Michelle Mitchell, the Mary Poppins of Math. Not only is she an accomplished teacher, but you can feel her love of math and the kids she teaches. She sees the best in them, and they rise to the occasion. Not only did my boys learn, they actually love math again....like, "sit at the dinner table and talk/joke about parabolas", love math. She teaches in a way that kids retain and understand the concepts and apply them in life, versus just "getting the problems done." Michelle has been an incredible partner and blessing to our family. As adults, we often look back and talk about the teachers who impacted our lives because they were incredible role models, made the subject fun, and taught us so much. I'm confident that, when my boys are older, they will be talking about Michelle Mitchell. *C. Armstrong*

She is very helpful. She works hard to explain the material in a way that I can understand. Her excitement is contagious. *C. Helbling*

**My son now loves math and understands difficult concepts thanks to Ms. Mitchell! She encourages them to think outside the box with fun projects throughout the year.**

I had a disheartening math class before taking Geometry with Ms. Michelle. No one could answer my questions about the reasoning behind the concepts; they just wanted me to follow the math rules and use them to complete assignments. Ms. Michelle recognized the joy I have in understanding "the why" behind things and encouraged me to keep asking questions. She was understanding, and helped strengthen my curiosity, while also linking the complexity of math to a complex and intelligent Creator. I highly recommend her for anyone who has a natural curiosity and a love for knowing the "why" behind things. *E. Shelton*

Miss Mitchell is a fun and engaging teacher who makes the material interesting and explains it in a way that is impossible to forget. She is kind and loving and makes sure everybody understands the concepts. In all, she is a wonderful person to interact with and has greatly impacted my life. *T. Dahlie*

Our son thrived under Miss Mitchell's approach to math. On top of normal math problems, she assigned essays and art projects to drive home both the biblical view of mathematics as well as the life applications. These were fun assignments, and she always gave plenty of time and encouragement for them to be completed. We loved how these extra pieces were used to prove how much math is a part of everyday life. *A. Bennihan*

My daughter took Algebra 1 with Michelle. The previous year, she had struggled working independently at home in math, but in Michelle's class, she was very successful. Being able to meet in person with her teacher and have personalized feedback to her questions was very helpful. She enjoyed the class as a student, and as a parent, I appreciated all of Michelle's help in making difficult concepts easier for my daughter to understand. I also love that she integrated art, science, and the Bible into her math class. She is an excellent teacher who exhibits love and care for her students. I highly recommend her as a math instructor. *V. Rough*

Miss Michelle is such a fun teacher and she's so great at it! Everything she teaches is always thoroughly explained and I understand it. She also makes a person feel comfortable with asking questions if they need to. It's easy to learn from her and build a relationship with her. She's fun, sweet, and loves the Lord! *L. Booth*
